In this document, we use numerical mode of `natbib.sty`. That is, we cite references by number index.

To use numerical mode of `natbib.sty`, we use the following setting.

- Load `natbib.sty` with option "`numbers`" like
  `\usepackage[numbers]{natbib}`
- Use "`econ-no-sort.bst`" which means that entries in the reference are listed in citation order (not alphabetical order).
- Use `\citep` command instead of `\citet` command.
  Note: strictly speaking, we use `citet` command but redefine `citet` command in the preample so that it is equal to `citep`.

Cited entries:
